

TECHNO #155 ADHESIVE

BASE:	Synthetic Elastomer
SOLVENT:	Ketone/Aliphatic Hydrocarbon Blend
COLOR:	Clear
CONSISTENCY:	Medium Thin Liquid
VISCOSITY:	Brookfield 1/20 300 cps @ 70°F
SOLIDS:	% By Weight – 41% +/-2%
SPECIFIC GRAVITY:	6.7 +/- .2 lbs/gal
VOC:	187 Grams/Liter

DESCRIPTION: This is a spray applied adhesive for bonding all types of substrates: cloth, wood, metal, high-pressure laminates, various foams, ABS and other plastics. All substrates should be tested prior to use. It has excellent application characteristics including quick tack, high coverage, excellent heat resistance and high strength bonds.

APPLICATION: Spray atomization pressure 15 – 20 psi
Fluid pressure 10 – 15 psi

COVERAGE: 400 – 600 sq ft/gal

CAUTION: This cement is flammable. Keep away from sparks and open flames, and provide adequate ventilation.
